Professional Experience

Circana Market Research | Customer Operations & Client Analyst

Dublin, Ireland | 2024 – Present

Own end-to-end customer operations for a 200+ customer portfolio, resolving high-volume queries, safeguarding data integrity, and driving the reporting and process improvements that keep service running smoothly.

- Owned the customer relationship for 200+ accounts as primary point of contact, resolving **80+ queries and issues weekly** within SLA and sustaining consistently high customer satisfaction.
- Managed customer account registration and onboarding for **25+ new accounts per quarter**, personally safeguarding customer database integrity through **SQL** and **SAP S/4HANA** validation and reconciliation.
- Delivered accurate, on-time KPI reporting and analysis in **Power BI**, **Tableau**, and **Advanced Excel**, giving the team and leadership a clear, real-time view of customer performance with **100% on-time delivery**.
- Drove continuous improvement across customer processes, cutting recurring errors by **25%** and manual effort by **20%** through standardisation and automation.
- Investigated and resolved data discrepancies with **SQL** and structured root cause analysis, protecting the accuracy of customer records and preventing repeat issues.
- Acted as the trusted link between customers and internal teams, coordinating fast resolution and turning customer feedback into lasting process improvements.

Estée Lauder Companies | Customer & Retail Operations (B2C)

Dublin, Ireland | 2022 – 2024

Delivered customer service and retail operations for a global B2C consumer beauty brand, supporting the end-to-end customer experience across retail locations.

- Handled customer queries and resolved issues across retail operations, delivering excellent B2C customer service and a smooth customer experience.
- Maintained accurate customer and account records and supported day-to-day transaction and reporting accuracy across retail teams.
- Built **Advanced Excel** KPI trackers (VLOOKUP, Pivot Tables) and **Power BI** reports to monitor customer and sales performance.
- Identified gaps in the customer and sales process and implemented improvements, lifting conversion by **20%+** and improving the customer experience.
- Resolved escalated customer queries and complaints in a fast-paced retail environment, consistently turning issues into positive

customer experiences and repeat custom.

- Balanced multiple priorities to tight deadlines during peak retail periods and product launches, keeping service quality and record accuracy high throughout.
- Coordinated 5+ customer-facing product launches annually, managing logistics and communication from planning to execution.

Tata Consultancy Services | Systems Analyst

Chennai, India | 2020 – 2022

Delivered data validation, analysis, and reporting for banking and insurance applications across 15+ releases, maintaining high data integrity.

- Designed and executed **100+ SQL** queries to validate and reconcile customer and transaction datasets, achieving **100% data accuracy** across all releases.
- Extracted and structured data from **SAP ERP** using SQL joins and stored procedures for downstream reporting.
- Led root cause analysis on data discrepancies; corrective actions reduced recurrence by **30%** and improved system reliability by **25%**.
- Supported customer account and claims data accuracy for a major banking and insurance client, keeping records correct, consistent, and audit-ready.
- Coordinated UAT and resolved issues across 15+ releases, communicating clearly with stakeholders to fix defects before go-live.
- Identified and implemented process improvements that streamlined data validation and reduced manual effort.
- Documented processes and resolutions in **Jira** and **Confluence**, supporting traceability and stakeholder alignment.
